

# Special Update – Lake A/C Spillway

September 15, 2011

- LAKE A/C SPILLWAY COMPLETED - We are very pleased to announce that the Lake A/C Spillway project has been completed on schedule and the lakes are ready to hold water. As you know, the lakes are filled by rain and storm-water runoff so as we start getting some rain, they will begin to rise.
- LAKEBED WEEDS BEING TREATED- We have hired West Tennessee Pond Management to address the weed & vegetation problems in the Lake A/C lakebeds. Much of the lakebeds have already been treated. Some areas will be addressed when the lake water levels rise.
- LAKEFRONT PROPERTY OWNERS – Residents are asked to please keep your lakefront property clean and maintained.

Thank you for your patience and support through this very complex construction project.

Best Regards,

Your CWL Board

Note: Please share this information with your neighbors, as we don't have everyone's Email address.
